**TSCA Section 6(h)
for APNA Thermylene® and Thermylon® products**

January 6, 2021 the Environmental Protection Agency (EPA) released final rules under TSCA Section 6(h) for five persistent, bio accumulative and toxic (PBT) chemicals. The final rules limit or prohibit the manufacture (including import), processing, and/or distribution in commerce for the following chemicals:

- Decabromodiphenyl ether (DecaBDE)
- Phenol, isopropylated phosphate (3:1) (PIP (3:1))
- 2,4,6-Tris(tert-butyl)phenol (2,4,6-TTBP)
- Hexachlorobutadiene (HCBD)
- Pentachlorothiophenol (PCTP)

Asahi Kasei Plastics North America does not intentionally add the chemicals listed above to our Thermylene® and Thermylon® products. Products are not tested for the substances listed. This determination is based on information provided by our suppliers. If you have additional questions, feel free to reach out.

Sincerely,

Sherry Hang
